Innovation Day 2021:  
In-Person Attendance Guidelines

We look forward to welcoming you to the Science History Institute and Innovation Day! The health and safety of our visitors and staff is our top priority. Please be assured that the Institute and SCI America are following the guidance and directives from the Centers for Disease Control (CDC), the State of Pennsylvania, and the City of Philadelphia as it pertains to protecting staff and visitors from contracting and spreading COVID-19.

The Science History Institute requires all Innovation Day in-person participants to be fully vaccinated (as defined by the CDC) against COVID-19. Proof of vaccination may include the CDC COVID-19 Vaccination Record Card, or an official immunization record issued by your state or local department of health that contains the same information as the CDC card. **You must show your proof of vaccination plus a photo ID at the registration desk at the Science History Institute, prior to entry. Guests with no proof of vaccination will not be admitted. There will be no exceptions.**

The Philadelphia Department of Health requires Innovation Day participants to wear a mask except while actively eating or drinking during the continental breakfast, the Innovation Day luncheon, and cocktails and networking at the end of the day.

An inherent risk of exposure to COVID-19 exists in any public space where people are present. We cannot guarantee that you will not be exposed to COVID-19 during your visit to the Science History Institute. Those visiting the Science History Institute do so at their own risk of such exposure.
